(57) **ABSTRACT**

The present invention relates to a cosmetics case for storing cosmetics such as liquid lipstick and/or foundation and forced discharging the cosmetics as it needs, more particularly, a cosmetics case comprising an upper movable part and a case body, the upper movable part coupled to a cap at top portion thereof while the case body mounted with a plug at bottom portion of the case body, wherein the case has a piston screw-coupled to a screw rod inside the case body and a spring and a reversing ball mounted inside an inner hole formed on top end of the screw rod so that, depending on the case body rotating in normal/reverse directions, the piston goes up and comes down and presses on the reversing ball to make the inner hole to be opened/closed, thereby free controlling discharge and isolation of liquid cosmetics.
